

# PROJECT NAME: ELK CREEK

SIZE: 953 ACRES

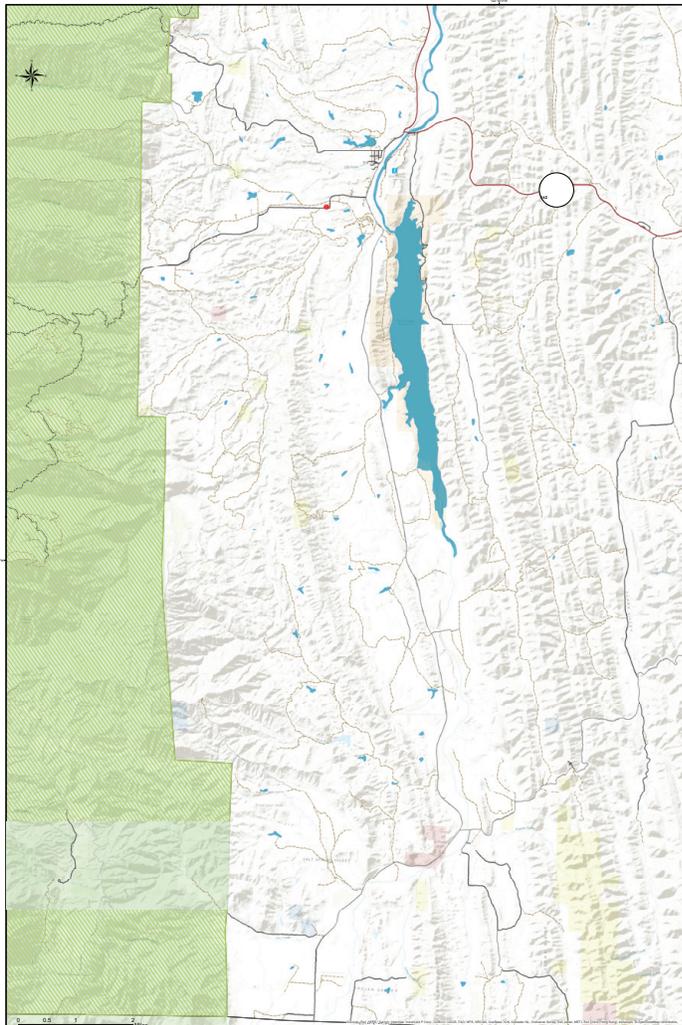

## PROJECTED COMPLETION DATE:

12/01/19

## LOCATION:

Elk Creek, Glenn County, Tehama County.  
CAL FIRE Tehama-Glenn Unit.

**Summary:** Over the past 8 years, 4 major fires have impacted the communities of Elk Creek and Stonyford. Fuels in the area are grass and oak woodland with heavy components of brush. The fires that have occurred have been fast moving. Response times for emergency equipment are extended due to minimal resources in the area. A fuel break using masticators, and hand crew work would provide needed protection to these communities. The fuel break identified has been used for multiple major fires.

**What communities or habitats will project protect?** Elk Creek, Stonyford.
