

Introducing **AwareCA**

Emergency Information Directly from First Responders

What is AwareCA?

AwareCA is California's official statewide emergency information platform, providing verified, near real-time emergency information directly from the public safety agencies managing incidents. Designed as a mobile-first application, AwareCA gives Californians one trusted source for accurate emergency information before, during, and after disasters. AwareCA Delivers agency-verified, time-stamped information to help cut through rumors, unofficial social media posts, and conflicting reports during emergencies.

► Improves Situational Awareness for Californians:

Near real-time incident updates

Interactive emergency maps

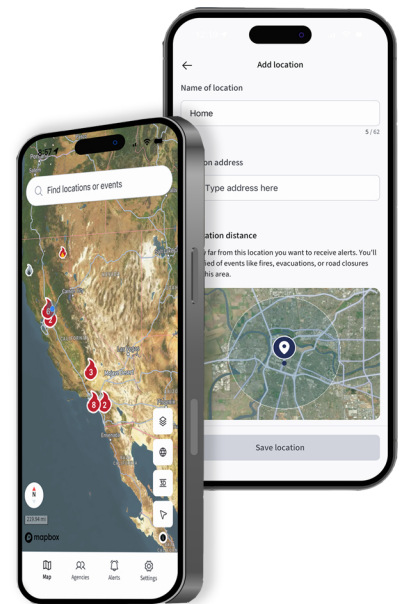

Evacuation Zones, Shelter and Assistance Locations

Road closures and Hazard information

Push notifications and location-based alerts

► Supports Statewide Coordination

Helps ensure consistent public messaging during multi-agency emergencies, reducing confusion and improving public trust.

► Designed for Today's Users

A mobile-first platform that keeps Californians informed before, during, and after emergencies.

Download AwareCA today and customize your notifications before disaster strikes. Stay informed with verified emergency information from California's public safety agencies—because knowing what's happening and knowing what's true can help protect lives and communities.
