IRA Green Schoolyards Additional Campuses Form

Campus #: _____

When identifying campus latitude, longitude and census tract numbers please use the following links: Latitude and Longitude Finder to provide a central point in your project area and the California Climate Investments Priority Populations when identifying the 10-digit census track number.

Upload a screenshot in eCivis showing that the campus, population, an/or community served is identified as a disadvantaged or low-income community per one of the tools listed above. *
Documents and/or pictures need to be combined and uploaded as a single PDF.

Campus Name *

All Campuses included in the project must be listed by name in the grant application.

Campus Address *

What is the requested dollar amount for this campus? *

Latitude and Longitude. *

Enter the latitude and longitude in decimal degrees, using the format (##.###, ###.####).

List county and census tract numbers for this campus. *

Word Count: **0 / 50**

What is the square footage of outdoor space accessible to children and the proportion of asphalt/concrete? *

Word Count: **0 / 50**

Would this project remove any asphalt or concrete on this campus? If yes, how much square footage (unit of measure) of asphalt or concrete do you anticipate for removal?

Word Count: **0 / 250**

If the property owner is different from the applying entity, identify the owner of the property and provide their email address and phone number.

Word Count: **0 / 250**

If you are leasing the property, state how long you have leased it for, when the lease agreement was signed, and when it expires. Discuss your long-term plans for occupying this property.

Word Count: **0 / 250**

NOTE: If you are leasing the property, attach a copy of your lease agreement to this form.

Documents and/or pictures need to be combined and uploaded as a single PDF.

NOTE: If you are leasing the property, attach to this form a Memorandum of Understanding (MOU) between the applying entity and the property owner showing long-term commitment to the project.

A memorandum of understanding (MOU) ensuring long-term commitment to the project is required at the time the application is submitted. Applicants shall obtain MOU from property owner IF the applicant does not own the property. Upload as a single PDF.

What percentage of students are low-income at this campus? *

Word Count: **0 / 250**

What proportion of the facility's annual budget is from government funding? Describe the annual government funding the facility receives to support the student population. *

Word Count: **0 / 250**

Attach to this form supporting documentation on government funding the school receives, such as, subsidized tuition, etc. *
Documents and/or pictures need to be combined and uploaded as a single PDF.

Explain this facility's current site maintenance practices and plan for long-term maintenance of the Green Schoolyards project. Do you anticipate further financial need to ensure future management? *

Word Count: **0 / 250**

Explain the proportion of time children spend outside and activities they are involved with on this campus, including those that include natural components. *

Word Count: **0** / 500)

Campus Community Engagement Plan *

Describe how the campus community will be authentically engaged in the project.

Word Count: **0 / 500**

Campus Project Timeline *

Provide a general project timeline. Do not list specific dates or months due to uncertainty in when projects may begin. Plan on projects ending no later than March 31,2028.

Word Count: **0 / 250**

Campus Tree Information

Provide a list of the tree and/or plant species for this campus, including common name, genus, and species. *

Include the approximate number of each species and planting stock size for each species.

Word Count: **0 / 500**

Total number of CAL FIRE funded trees for this campus: *

This should match the total number of trees in your budget for this application. This question is required if your project has a tree planting component.

If your project includes a tree planting component, describe how trees planted will be cared for long-term.

Although post-grant maintenance funds are not available, applicants must agree to provide or ensure maintenance on all trees planted, including replacement trees, for at least three years after the grant period.

Word Count: **0 / 500**

Attach to this form the existing long-term tree care plan.

A long-term tree maintenance plan template is available to help grantees prepare. Documents and/or pictures need to be combined and uploaded as a single PDF.

Attach to this form site images for this campus. Provide 5-10 representative site photos. *

Photos should be at sufficient distance to show the current state of the project site and support project objectives. Submit all site photos in a single PDF document and include a short description with each image.
