

Introducing the New and Improved Fire and Resource Assessment Program Website!

Experience Enhanced User-Friendliness and Streamlined Information at our New URL

The California Department of Forestry and Fire Protection (CAL FIRE) is excited to announce the launch of the newly redesigned Fire and Resource Assessment Program (FRAP) website! With a focus on improving user experience, the updated site is now live and can be found at its new URL:

<https://www.fire.ca.gov/what-we-do/fire-resource-assessment-program>.

As part of our ongoing commitment to providing the public with easy access to essential information, the new website features a more user-friendly interface with information condensed onto fewer pages. This streamlined approach allows visitors to quickly find the resources they need without the hassle of navigating through multiple pages.

The previous URL, <https://frap.fire.ca.gov>, has been retired, and all traffic will now be redirected to the new address. We encourage everyone to update their bookmarks and start exploring the new site.

Some key features of the revamped FRAP website include:

Intuitive navigation: Quickly access the information you need with our simplified menu and site structure.

Responsive design: Enjoy a seamless browsing experience on any device, whether you're using a smartphone, tablet, or desktop computer.

Comprehensive resources: Find valuable data, tools, and publications related to California's forests, fire hazards, and more, all in one convenient location.

We invite you to explore the new FRAP website and experience the enhanced user-friendliness for yourself. As always, we welcome your feedback and look forward to continuously improving the site to better serve the needs of our visitors. For any questions or comments, please feel free to contact us through the website's "Contact Us" page.

Don't miss out on the latest updates and resources – visit the new Fire and Resource Assessment Program website today!
