Fireworks Coding

NFIRS contains codes that indicate that an incident or injury was caused by fireworks.

NFIRS data is used at the national, state, and local levels to allocate funding, write legislation, and determine staffing and training needs.

Statistics are queried from the codes selected in the NFIRS reports.

If there is no code selected to indicate that the incident was caused by fireworks, it cannot be included in fireworks statistics.

A list of available fireworks coding options can be found on the CalStats website:

[Fireworks Coding Options](#)

REMINDER

All 2022 NFIRS data is due by **July 1, 2023.**

Only valid incidents that were successfully imported by this due date will be included in national statistics and the Public Data Release.

For more information on NFIRS reporting, visit the CalStats website:
