## eNFIRS Monthly Incident Count Verification and Comparison Instructions

### Overview

California fire departments report their incident response activity to the National Fire Incident Reporting System (NFIRS) database through the eNFIRS system. The CalStats team imports this data to the California state database on a daily basis. Every Friday, CalStats publishes two monthly incident count reports on the [CalStats website](#). **Comparing the totals in the two reports will help ensure both databases produce accurate statistics.** If the totals in the two databases do not match, please call (916) 247-1492 or email [calstats@fire.ca.gov](mailto:calstats@fire.ca.gov) so we can assist you with resolving the discrepancy.

### Process Summary

1. Go to the CalStats website: [California Incident Data and Statistics Program](#)
2. Scroll to the section titled, **NFIRS Reporting Verification**.
3. Click on each linked report.
4. Compare and confirm the numbers for each month.

## eNFIRS Monthly Incident Count Report

The eNFIRS Monthly Incident Count Report shows each month's incident count separated into valid and invalid columns for the current year and the previous 2 years. To compare these totals with the OSFM Monthly Incident Count Report, the user should sum the valid and invalid columns to find the total for each month.

### 11223 FICTITIOUS FD

Year	Total	Valid	Invalid	Jan Valid	Jan Invalid	Feb Valid	Feb Invalid	Mar Valid	Mar Invalid	Apr Valid	Apr Invalid	May Valid	May Invalid	Jun Valid	Jun Invalid	Jul Valid	Jul Invalid	Aug Valid	Aug Invalid	Sep Valid	Sep Invalid	Oct Valid	Oct Invalid	Nov Valid	Nov Invalid	Dec Valid	Dec Invalid
