Data Quality Matters

By reporting your incidents to the National Fire Incident Reporting System, the data you provide becomes an essential part of a life-saving service that enables people to query important information. Accuracy is important, please verify the figures in both the national and California databases. Follow the provided link to compare the data and complete the necessary steps.

Data & Statistics

If your NFIRS software does not support data querying and you require information for grant applications or to effectively budget and plan for strategic organizational activities, such as training and risk reduction programs, we are here to assist you. Please send an email to calstats@fire.ca.gov, and our team will provide guidance.

DID YOU KNOW ?

You can review and update your fire district's GIS boundaries, here:
