

California Zero-Emission Vehicle & Infrastructure Webinars

The California Air Resources Board and our partners invite state employees to an informational webinar series on zero-emission vehicle and infrastructure programs. These learning opportunities will take place throughout 2025 and provide a comprehensive view of California’s all-of-government approach to supporting the growth of zero-emission vehicles across major transportation sectors. Attendees will learn about fuel and vehicle emissions regulations supporting the deployment of zero-emission vehicles, incentive programs, electric charging and hydrogen fueling infrastructure planning, charging and hydrogen fueling station development and incentives, and electric grid planning and development. Attendees will hear from experts across state agencies and the California Independent System Operator over the course of five webinars.

Next Webinar

February 13, 2025 12:00-1:00 p.m. Prologue: Zero-Emission Vehicle and Fuel Programs
 Register: bit.ly/ZEVwebinars

Upcoming Webinars: Registration Details to Come

April 17, 2025	12:00-1:00 p.m.	Chapter 1: Charging Your ZEV at Home and On the Go
June 19, 2025	12:00-1:00 p.m.	Chapter 2: Ensuring a Resilient Electric Grid
August 7, 2025	12:00-1:00 p.m.	Chapter 3: Adding Hydrogen in the Mix
October 9, 2025	12:00-1:00 p.m.	Chapter 4: Charging and Fueling Big ZEVs and Working ZEVs
